

Buongiorno a tutti i soci e membri del MEWG,

I am herewith presenting myself as a candidate for one of the three open positions of vice coordinator (V.C.) for the MEWG of CCIC. In order to let you evaluate my fit to the position I shortly share my past experience and what I am currently doing and focus on.

I am Mirko Turrina, born in the beautiful Verona in the 1976. Since 2001 I am holding a Bachelor in Mechanical Engineering from Padova's University and since 2014 an MBA from a top FT-ranking MBA from Hong Kong Science University of Science and Technology.

I have been working and living in China P.R.C. since the last quarter of 2004. I spent 14 year in the heavy equipment machinery sector for aluminum extrusion manufacturing in Foshan, while since 2018 I am the GM of Goglio Tianjin Packaging. Goglio is a flexible packaging solution provider with an history of more than 170 years in Italy. Our solutions are including filling equipment, consumables and product development services for brand owners. Even though our TAM theoretically includes all the application that requires years of protection from oxygen and moist, our brand is indeed leader in few specific fields, such as the bulk packaging of processed fruits, retail packaging for roasted coffee and vacuum packaging (mainly rice and yeast). Goglio Tianjin was the first investment in the Tianjin Airport Economic Area (TAEA) in the old 2004 and now in this area authorities has decided to set-up a SME Business center targeting Italian enterprise and where CICC should may open soon a desk.

P.R.C. is a Country with a continental size, therefore I appreciate the actions done so far by MEWG and CCIC in fostering sharing and deploying a network in more cities. This is not helping anyone directly, but yet all of us to be perceived more valuable from authorities, a key set of players for the economy especially in the North. Having experienced myself the "South-North Gap", I appreciated the idea of having vice coordinators with a focus on some "new areas", therefore I propose myself as V.C. with a focus on North east area.

Here below some key points about my professional path.

Cordiali Saluti, Mirko
